

4.0 UNAVOIDABLE ADVERSE IMPACTS

As required by SEQRA, this section of the DEIS specifically addresses “those adverse environmental impacts that cannot be avoided or adequately mitigated if the proposed action is implemented”. This section is not intended to summarize positive environmental impacts or any impacts which have been mitigated as set forth in the applicable subsection of Section 3.0 of this DGEIS.

Development of the Project would result in construction-related impacts that cannot be avoided regardless of the mitigation measures considered in Section 3.0 of the DGEIS. These impacts are temporary in nature and associated with the construction phase of the project.
